

9<sup>th</sup> December 2016

IBT/SCK/CH209

Dear Parent/Carer

As part of our commitment to supporting our students in their learning in Science, we are running weekly extension sessions every Friday at 3.30 p.m.

The purpose of these additional sessions are to support your child to revise and revisit the topics taught in Year 9 and Year 10 and also to develop examination technique and confidence. The sessions will take place with your child's usual Science teacher in their usual timetabled classroom/Science lab.

Extension sessions have proven to have significant impact on the outcomes for students and so we would strongly urge all year 11s to attend.

The examinations may seem a long way off now, but there is only 25 weeks or time for 25 extension sessions between now and the examinations. With every week that passes, the opportunities to learn get smaller, whilst the examinations get closer and closer.

We would appreciate your support in encouraging your child to attend the sessions and benefit from the support offered, so we can work together to ensure your child gets the very best results, of which they are capable, which will help them in the next stage of education or employment.

Please complete and return the reply slip below to your daughter/son's Science teacher.

Yours sincerely

Ian Booth  
Director of Learning, Science
